

Federal Ministry of Environment
Department of Climate Change

Result of the Nigerian Institutional Clean Cookstove Acceleration Scheme (NICCAS)

The Department of Climate Change, Federal Ministry of Environment (FMEnv), herewith announces that the following bidder has been selected as part of the Nigerian Institutional Clean Cookstove Scheme (NICCAS).

Lot Name	Company name
North	Sosai Renewable Energies Company Limited

NICCAS is a nationwide open competitive tender designed to select reputable companies specialising in the manufacturing or distribution of institutional level clean cookstoves. The winner of the tender will be supported in deploying institutional level clean cookstoves with an in-kind support and technical assistance.

The tender is championed by the Federal Ministry of Environment (FMEnv), with the financial support of the European Union (EU) and the German Government through the Nigerian Energy Support Programme (NESP) implemented by Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ).

In addition, the Federal Ministry of Environment (FMEnv) with the support from the NESP wishes to strengthen the capacities of local clean cookstove manufacturers/distributors on techno-economic aspects. To this aim, local companies will be invited to express their interest in receiving training in the coming months. Training beneficiaries will be selected based on a simple set of criteria that will be published with the Call for Expressions of Interest. The training will be delivered through Webinars in the 3rd quarter and a physical training in the 4th quarter of this year (provided that the situation caused by COVID-19 outbreak allows).
